

Act to Combat Flooding Worksheet

Flood:ED Challenge

We've created this worksheet as an example of how you could summarize your action project to combat flooding. However, we encourage creativity and while you are welcome to fill this worksheet in and submit it with your challenge feel free to submit your project summary in any other format you would like (for example in another written form, video, Google Slide, etc).

Summarize your action project

Tell us what action project did you complete to combat flooding in your school and why did you choose it? Explain all the steps involved in completing the project, all the people involved in the project, and the time it took to complete the project. Make sure to attach photos and videos!

Act to Combat Flooding Worksheet

Flood:ED Challenge

Summarize the impacts of your action project

Tell us the difference you made with your action project! What are some positive impacts of your action project? How has it helped combat flooding? Did you accomplish any environmental impacts? For example diverting flood and stormwater by installing rain collectors or barrels, removing CO₂ emissions from the environment by planting trees, or diverting waste from the environment that can be washed away into streams with rain or stormwater.
