Backgrounder: How does Canada contribute to global GHG emissions?

Canada is among the top 10 largest global greenhouse gas emitters of the world. In 2016, Canada emitted approximately 780 MtCO₂e or 1.6% of total global **greenhouse gas emissions**. Canada is the 10th largest global greenhouse gas emitter in the world (Climate Watch, n.d.).

Canada is the largest emitter of greenhouse gas emissions per capita, emitting approximately 22 tCO₂e per capita in 2016.
