

Electrifying the Future

Charging Ahead with Learning Pathways for Teachers

GreenLearning's Electrifying the Future (ETF) Pilot Project integrated electric vehicle education and infrastructure within the Calgary Board of Education. The EV transition will mean changes to infrastructure and curriculum and we encourage you to join the conversation to see how your school can lead this change. **For more information about ETF, please view our [blog post](#) and [this video](#).**

1 Attend an Educator Workshop

Hear directly from the automotive teacher in charge of the project via a pre-recorded video and provide your feedback.

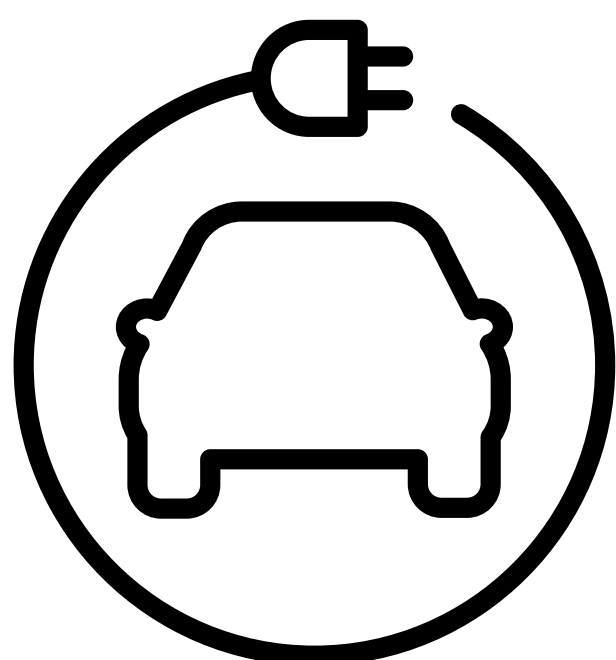

2 Your Students Attend a Workshop

This live, virtual workshop will have your students exploring EV myths and facts and dive into discussing EV integration at their school.

3 Explore our EV materials

We will share with you a wide range of resources we created specifically to further your EV education.

4 Join the Conversation

Share your thoughts, stay connected and join a national conversation to help your school and school board create pathways for EV learning.

Questions?

We'd love to connect!
