

Electrifying the EV Future

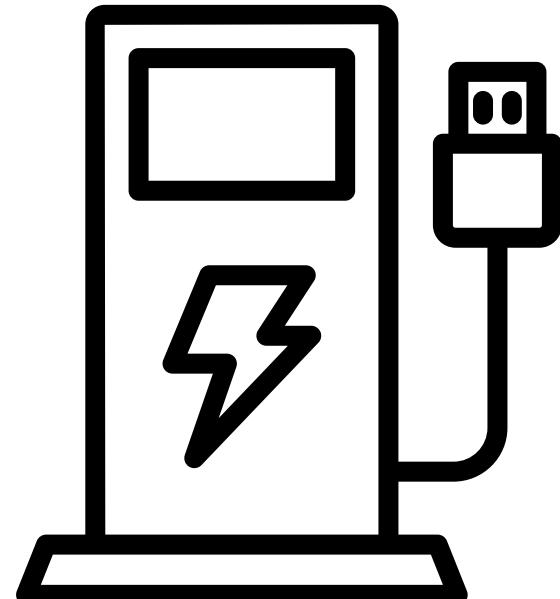

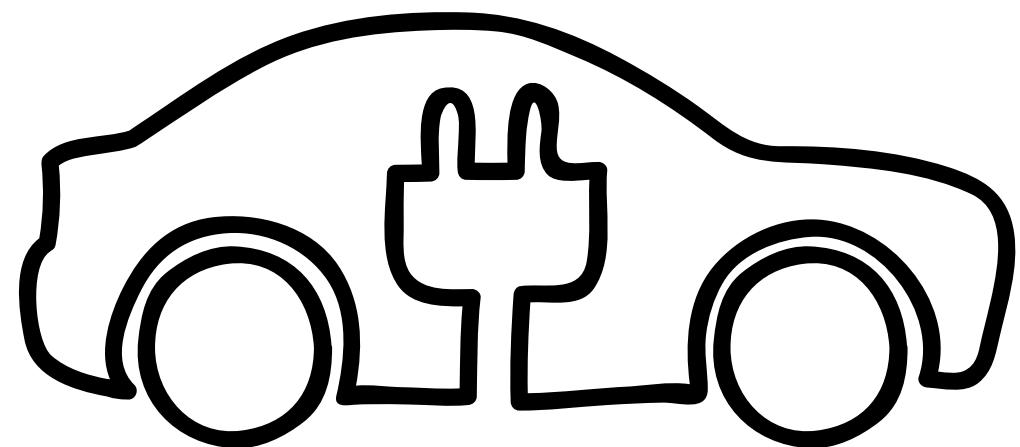

Charging Ahead with Learning Pathways for Teachers

The EV transition will mean changes to infrastructure and curriculum and we encourage you to join the conversation to see how your school can lead this change but registering for this initiative.

For information about our pilot EV conversion project, *Electrifying The Future*, please view our [blog post](#) and this [video](#).

Participate in a Free, Live Virtual Workshop for your students

Your students will explore EV myths and facts and discuss EV integration at their school.

Watch a pre recorded video from the automotive teachers

Hear directly from the automotive teachers in charge of the project and provide your feedback.

Explore our EV materials

Our handy educator guide references all our EV learning materials in one place.
