

Electrifying the EV Future

Charging Ahead with Learning Pathways for Teachers

GreenLearning's Electrifying the Future (ETF) Pilot Project integrated electric vehicle education and infrastructure within the Calgary Board of Education. The EV transition will mean changes to infrastructure and curriculum and we encourage you to join the conversation to see how your school can lead this change. **For more information about ETF, please view our [blog post](#) and [this video](#).**

1 Attend an Educator Workshop

Hear directly from the automotive teacher in charge of the project via a pre-recorded video and provide your feedback.

2 Your Students Attend a Workshop

This live, virtual workshop will have your students exploring EV myths and facts and dive into discussing EV integration at their school.

3 Explore our EV materials

Hear about our learnings first hand, join us to discuss strategies for your board and what teachers are saying.

Questions? We'd love to connect!
