

| Activity Name | Organizing Idea | Learning Outcome |
|------------------------------------------------------------------------------|-------------------------------------------------|--------------------------------------------------------------------------------------------------|
| Activity: Hot Spot Investigators | Sustainable Practices, Types of Earth Materials | Earth materials change as they move through the rock cycle and can be used as natural resources. |
| Activity: School Greening: Investigating Simulator Solutions | Sustainable Practices, Types of Earth Materials | Earth materials change as they move through the rock cycle and can be used as natural resources. |
| Activity: Flood Risk Management Awareness | Sustainable Practices, Types of Earth Materials | Earth materials change as they move through the rock cycle and can be used as natural resources. |
| Activity: Flood:ED School Greening Simulator | Sustainable Practices, Types of Earth Materials | Earth materials change as they move through the rock cycle and can be used as natural resources. |
| Activity: Flooding Mapping Tour | Sustainable Practices, Types of Earth Materials | Earth materials change as they move through the rock cycle and can be used as natural resources. |
| Activity: Flooding and Climate Change | Sustainable Practices, Types of Earth Materials | Earth materials change as they move through the rock cycle and can be used as natural resources. |
| Activity: Climate Change in My Watershed Inquiry | Sustainable Practices, Types of Earth Materials | Earth materials change as they move through the rock cycle and can be used as natural resources. |
| Activity: Extreme Weather Inquiry | Sustainable Practices, Types of Earth Materials | Earth materials change as they move through the rock cycle and can be used as natural resources. |
| Activity: Runoff Footprint | Sustainable Practices, Types of Earth Materials | Earth materials change as they move through the rock cycle and can be used as natural resources. |
| Activity: Understand Flooding | Sustainable Practices, Types of Earth Materials | Earth materials change as they move through the rock cycle and can be used as natural resources. |
| Activity: What are Floodplains and Watersheds? | Sustainable Practices, Types of Earth Materials | Earth materials change as they move through the rock cycle and can be used as natural resources. |
| Activity: Flood Resilience Plan for Your School | Sustainable Practices, Types of Earth Materials | Earth materials change as they move through the rock cycle and can be used as natural resources. |

| | | |
|-----------------------------------------------------------------------------------|-------------------------------------------------|--------------------------------------------------------------------------------------------------|
| Activity: Preparing for Flood Resilience | Sustainable Practices, Types of Earth Materials | Earth materials change as they move through the rock cycle and can be used as natural resources. |
| Activity: Take Action: Adopt a Drain Campaign | Sustainable Practices, Types of Earth Materials | Earth materials change as they move through the rock cycle and can be used as natural resources. |
| Activity: Take Action: Build a Rain Garden | Sustainable Practices, Types of Earth Materials | Earth materials change as they move through the rock cycle and can be used as natural resources. |
| Activity: Take Action: Flood Protect Your Home | Sustainable Practices, Types of Earth Materials | Earth materials change as they move through the rock cycle and can be used as natural resources. |
| Activity: Chasse Au Trésor | Sustainable Practices, Types of Earth Materials | Earth materials change as they move through the rock cycle and can be used as natural resources. |
| Activity: Take Action: Home Flood Protector Scavenger Hunt | Sustainable Practices, Types of Earth Materials | Earth materials change as they move through the rock cycle and can be used as natural resources. |
| Activity: Take Action: Install Rain Barrels | Sustainable Practices, Types of Earth Materials | Earth materials change as they move through the rock cycle and can be used as natural resources. |
| Activity: Take Action: Plant a Tree | Sustainable Practices, Types of Earth Materials | Earth materials change as they move through the rock cycle and can be used as natural resources. |
