

# November 2021 Spark Activity

Our Spiral Inquiry Model is a unique framework to get learners engaged in a hands-on manner exploring a problem! Find out more by visiting the link below: <https://programs.greenlearning.ca/course/spiral-inquiry-model>

1

## SPARK

At this time of the year, we participate in many different acts of remembrance. How can we make our acts of remembrance more energy efficient, while still positively impacting the larger community around us?

3

## EXPLORE & RESEARCH

- Technology
- Local veterans' offices
- Military groups in the community for adults and youth
- Historical records

2

## HYPOTHESIZE & PLAN

- Can we participate in our acts of remembrance outside rather than in a large communal gym?
- What if we made our acts of remembrance digital? What kind of actions can we do that would support veterans in a meaningful way?
- Should these actions be personal/quiet or communal and large scale?

4

## ANALYZE & CHECK

- How will I know I was successful?
- What was difficult about this task?
- What can I improve on in this process?
- What can I take away from my research that can be used to make in my life or others?

5

## COMMUNICATE & ACT

Communicate results with your peers and take action to improve!
