## Research Questions Climate Change

### CLIMATE CHANGE

1. Describe the anthropogenic greenhouse effect. What role does it play in global climate change?

---

---

---

---

---

---

---

---

2. Which two effects of climate change concern you most? Explain the impact that each of them could have on human lives and/or the Earth's ecosystems during this century.

---

---

---

---

---

---

---

---

**3. Why do you think the rate of Canada's greenhouse gas emissions has continued to grow while the rate of emissions of many other developed countries has fallen?**

---

---

---

---

---

---

---

---

**4. What can we do about climate change? Describe two actions that Canadians can take as individuals, two actions we can take as families, and two actions we can take as a nation to prevent the most dangerous impacts of climate change.**
